

MIMI HALL, MPH

INSTRUCTOR

B I O :

With more than two decades of service in California local health jurisdictions, Mimi served 15 of those years as a county public health official in Sierra, Plumas, Yolo and Santa Cruz counties, leading these communities through H1N1, implementation of the Affordable Care Act and Medi-Cal Managed Care expansion, natural disasters and the COVID-19 pandemic. Her years in California's small and rural jurisdictions provided hands-on experience developing, implementing and evaluating programs, strategic planning, optimizing resources and including not only multisector stakeholders, but also those served, in the planning and delivery of public health programs and services.

Mimi has held a number of executive committee roles with the California Health Executives Association of California, the California Local Government Association, the California Association of Health Information Exchanges and several local boards and commissions. As an executive leader in public health, healthcare administration, government, and public health data modernization, Mimi has cultivated deep experience in local health jurisdictions, extensive relationships with key county, state, and association partners, as well as expertise in operationalizing equity and data driven decision in the administration of public health programs, systems, and funding.
