

Panel Presented by SacValley MedShare

“ Past, Present, and Future of Health Information Exchange: County Perspectives on Meeting DxF and CalAIM Demands”

MISSION STATEMENT

To improve the quality and safety of healthcare across California by sharing health information in a secure and efficient fashion between all providers, facilities, and patients.

John Helvey

SVMS Chief Executive Officer

“To be a catalyst of sustained improvement in the lives of those I touch.”

VISION STATEMENT

To become a model for inclusive provision of health information exchange across our diverse communities, that others may build upon to serve similar communities.

PANELIST #1

Dan Chavez

*Executive Director – Serving
Communities Health Information
Organization*

Dan has four decades of HIT and 23 years of health information exchange experience, including his seven-year tenure as the founder and CEO of the HIE in San Diego and as one of the founding employees of Availity, a company that successfully connected every provider with every health plan in the State of Florida. His leadership has propelled him to earn seats on the boards of 211 San Diego, Community Information Exchange San Diego, SHIEC, the national HIE industry association, and CAHIE, the California Association of HIEs, and the National Data Commission, a new, independent, not-for-profit HIE organization

PANELIST #2

Jessica Osbourne-Stafnes
*COO - North Coast Health
Improvement & Information Network*

Jessica received her BA in English from Humboldt State University (now CalPoly Humboldt) and her Masters in Health Sciences from the George Washington University. Jessica has provided strategic leadership for numerous cross-sector, collective impact initiatives in Humboldt County, including Aligning Forces for Quality (a Robert Wood Johnson Foundation funded initiative to address health care quality in Humboldt County), the Humboldt Community Health Trust (Humboldt County's Accountable Community for Health), and North Coast Care Connect (the County's innovative effort to establish a community information exchange). Her passion is to work on system transformation efforts to improve the health and wellbeing of the community in which she was born and raised.

and Information Network

PANELIST #3

Dr. Danielle Oryn
Chief Medical Informatics
Officer at Aliados Health and
Petaluma Health Center

Since medical school at Nova Southeastern University, Dr. Danielle Oryn has been passionate about leveraging technology to improve health care for the underserved. After completing residency in Family Medicine, she went on to complete a Masters in Public Health and a graduate certificate in Biomedical Informatics. As Chief Medical Informatics Officer at Aliados Health and Petaluma Health Center, Dr. Oryn provides leadership for initiatives in clinical systems, health information technology and quality improvement.

Aliados Health

PANELIST #4

William York

President & CEO of 211 San Diego

As the President & CEO of 211 San Diego, William York operates one of the most successful 211 providers in the nation. With his diverse expertise and knowledge in business management, care coordination service and information exchanges, and funding models, coupled with his spirit of collaboration and partnership, William has successfully secured 94 percent of the organization's \$14 million budget in fee-for-service contracts and business partnerships.

"Got Questions? We've Got Prizes! 🎁

Ask away and stand a chance to win awesome prizes.

Panel Questions:

What are the most effective strategies for fostering collaboration between QHIOs, HIEs, CIEs, and 211 organizations to ensure a cohesive and efficient data-sharing ecosystem that serves both health and social care needs across counties?

How can we streamline the governance and coordination between county health departments, QHIOs, and community-based organizations to create a unified approach to meeting data exchange requirements under initiatives like CalAIM and DxP?

How can we address the unique challenges of cross-county data sharing and infrastructure alignment, especially when different regions have varying levels of technological readiness, while ensuring QHIOs, HIEs, and 211 organizations remain aligned with local and regional needs?

What are the most significant barriers to cross-sector collaboration (e.g., technological, regulatory, financial) between QHIOs, HIEs, CIEs, and 211 organizations, and what role can counties play in helping overcome these barriers?

How can counties work with HIEs and QHIOs to ensure that community-based organizations have access to the necessary resources and data systems to meet the needs of diverse populations, especially in underserved areas that span multiple counties?
