Nicholas Montoya, MPA

Deputy Director, Kings County

THE STATE OF PUBLIC HEALTH

Pressures are Intense

Extraordinary possibility to address these challenges with flexibility and collaboration

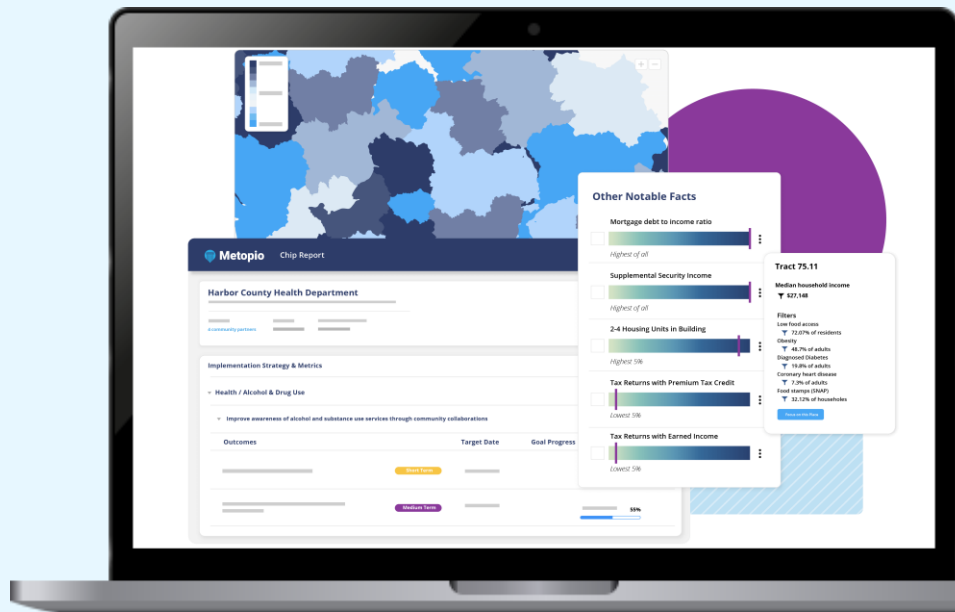

- Fragmentation
- Duplication
- Capacity Constraints
- Urgency
- Data Disappearance

One Framework, Endless Collaboration

What if...

- Partners could collaborate on a community survey but still get a unique report?
- You could meet different regulatory requirements across multiple entities?

ACCELERATE YOUR WORK

Lessons on Collaboration

- Local ownership fuels participation
- Common structure reduces friction
- Automation frees humans for human work
- Create aligned, unique reports

Engages with PHI

TRANSFORM DAY-TO-DAY WORK

Writing the Community Health Assessment

- Produce visualizations, analyze quotes and cite verified sources
- Identify patterns, root causes gaps in cross-cutting themes
- Ensure structure, compliance and community-driven results

[View detailed methodology](#)

The Community Health Needs Assessment (CHNA) for AMITA Kane County aims to identify and address the health needs of our community. This assessment is a collaborative effort involving key partners, including AMITA Health Mercy Medical Center, AMITA Health Saint Joseph Hospital, Northwestern Medicine Delnor Hospital, Advocate Sherman Hospital, INC Board, Kane County Health Department, and United Way. Together, we strive to improve the health and well-being of residents in Kane County.

Priority Populations

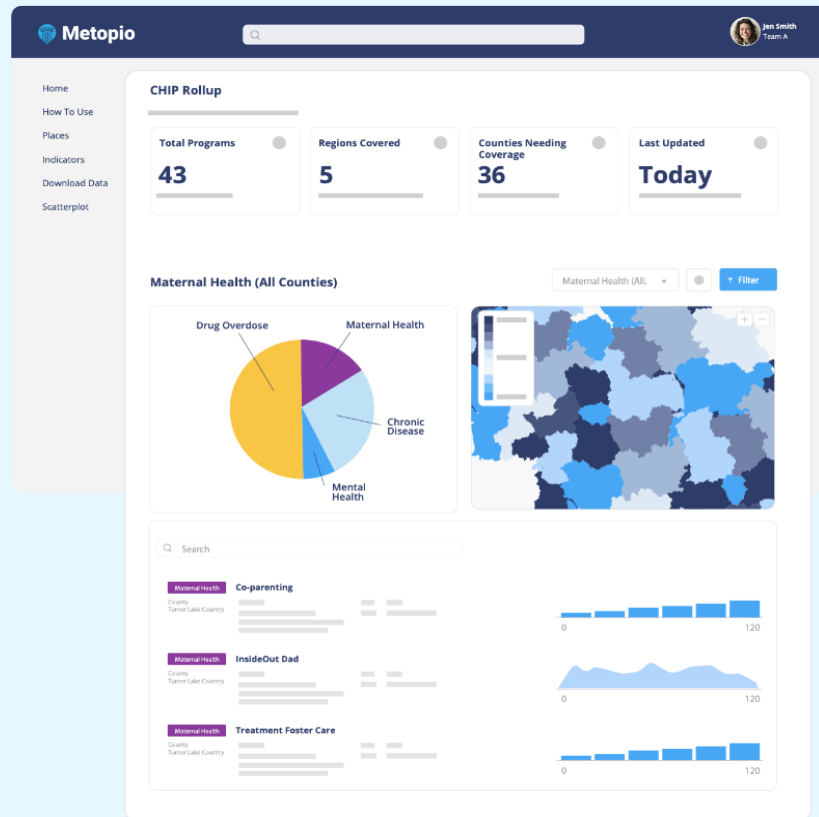

YOU'RE IN THE DRIVER'S SEAT

Creating & Managing CHIPs

- Monitor programs in real-time
- See the total impact
- Scale success, provide evidence based programs and collaborate

From Data to Action

Siloed and Repetitive Work

- Manual spreadsheets
- Duplicate surveys
- Ad-hoc charts
- Batch uploads
- Delayed roll-ups
- Inconsistent measures

One Connected Platform

- Data Integration
- AI reporting
- Ready-to-use templates
- Shared workspaces

Real-time Shared Intelligence

- Automated secondary data
- Community specific dashboards
- Instant roll-up
- Real-time statewide maps
- Targeted resourcing
- Evidence-backed policy

Preparing for the 2028 Joint CHA

Kings County's perspective on getting ready

NOT WAITING FOR 2028

Kings County Department of Public Health

- Kings County completed its most recent CHA in 2023 and CHIP in 2024
 - Build on our current CHA/CHIP work
 - Create a centralized data foundation using Metopio
 - Monitor health trends between assessment cycles
 - Engage partners and build familiarity with Metopio

SMALL STAFF

A Platform For Everyone

- Kings County Epi/Data Team
 - 1 Epidemiologist
 - 2 Business Applications Specialists (BAS)
- With Metopio, you do not need to be a data expert

THEN VS. NOW

Our Hope for the 2028 CHA

- Positives we have seen with Metopio:
 - Biweekly meetings
 - Platform growth and updates
 - Census track analysis
 - Build on existing data
 - CHA can be the foundation for action

PHAB ACCREDITATION

How Metopio Gets You There

- Covers 8 of 10 PHAB domains
- Pain-free CHA automation (aligned with MAPP 2.0)
- Stress-free CHIP with real-time dashboards
- Built to make your Community Health Improvement Cycle more than a checkbox
